

PUBLIC TRANSPARENCY REPORT
2025

T Capital Partners Co., Ltd.

Generated 24-11-2025

About this report

PRI reporting is the largest global reporting project on responsible investment.

It was developed with investors, for investors. PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders. This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2025 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2025 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented.

The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Trust is of utmost importance to us, and we believe that fulfilling our social responsibility by contributing to the sustainable prosperity of the companies in which our investment will enhance and disseminate trust as an investment company. As private equity fund managers, we also uphold a fiduciary duty to our investors. Our intention is to fulfill our social responsibility while making investments that earn the trust of our investors.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

During the reporting year, our organization made modest progress in advancing our responsible investment objectives. We are working on to enhance our ESG analysis framework to gain deeper insights into significant ESG factors influencing our investments, enabling more informed decision-making that balances financial returns with sustainable impacts. Additionally, we strive to engage with our investees on stewardship activities, emphasizing responsible corporate behavior and promoting long-term value creation. Our efforts involved collaborative discussions on important ESG topics, enhancing transparency, and supporting governance enhancements. Furthermore, we explored several initiatives internally and with stakeholders to address systemic ESG challenges when selecting portfolio companies. These efforts aim to foster positive change across sectors and support sustainable business practices, with some of our portfolio companies contributing aspects that align with SDGs. In this context, we have been actively enhancing the ESG aspects of our portfolio companies. This includes initiatives to improve workplace conditions for employees, bolster governance through enhanced management structures and the introduction of an executive officer system, development of business continuity plans (BCPs), waste reduction, increased recycling efforts, and participation in volunteer activities. Looking ahead, we are committed to making our best efforts to advance our responsible investment goals, while acknowledging our limited capacity to fully implement ESG practices. We will continue to improve our ESG integration processes and expand our stewardship efforts to create enduring value for our stakeholders. We recognize the critical importance of strengthening ESG practices for corporate development and believe these endeavors will contribute significantly to sustainability outcomes and resonate positively with investors.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

We increased its participation in seminars on ESG to gather information and contributed to the ESG Committee's data disclosure at the Japanese PE Association.

Section 4. Endorsement
